The New CHFP Program

Q: What is the purpose of HFMA’s certification program?

A: HFMA’s certification programs, like all certification programs, assess and recognize individuals who possess the knowledge and skills identified as essential to professional practice within the scope of a profession. For HFMA, the knowledge and skills assessed are those of a seasoned, mid-level (and aspiring executive) health care finance manager.

Q: I have heard that the certification program was revised. What are the changes?

A: The HFMA Board of Examiners has restructured the program as summarized in the following chart:

<table>
<thead>
<tr>
<th>Existing Certification Program</th>
<th>New Certification Program (effective January 2011)</th>
</tr>
</thead>
<tbody>
<tr>
<td>At least two (2) years of professional experience in healthcare financial management recommended</td>
<td>A minimum of 3-5 years healthcare financial (provider) management experience recommended</td>
</tr>
<tr>
<td>Successful completion of two (2) certification examinations required: the Core and a Specialty (Accounting &amp; Finance, Patient Financial Services, Managed Care, Physician Practice Management)</td>
<td>Successful completion of one (1) comprehensive certification examination is required</td>
</tr>
<tr>
<td>Candidates must be regular members of HFMA for a minimum of two (2) years.</td>
<td>Candidates must hold HFMA membership. No time duration prior to becoming certified is required.</td>
</tr>
<tr>
<td>Preparation materials are available as printed hard copy</td>
<td>Preparation materials are available online (printed materials are no longer available)</td>
</tr>
</tbody>
</table>

Q: At what career level is the certification program designed?

A: The intended audience for certification is mid-level healthcare finance professionals who aspire to the executive level and/or who desire confirmation of financial management expertise. Because the certification exam is directed to management level issues, the Board of Examiners strongly recommends that candidates have a minimum of 3-5 years healthcare provider management experience. This may be defined as hospital/healthcare provider operations management inclusive of financial responsibilities. Management experience is the primary preparation for the exam.

Examples of those mid-level healthcare finance professionals with suitable professional experience to take the examination would include: Director Patient Financial Services,
Director Reimbursement, Patient Accounts Manager, Billing Director, Controller, Director Business Services, Director Finance, General Manager Finance, Business Office Manager, Treasury Manager, Partner and Principal. The certification program would also be beneficial for senior accountants and senior financial analysts.

Q: I am interested in moving into the healthcare field. Would HFMA’s CHFP certification help me transition to healthcare?

A: The HFMA CHFP certification is designed for individuals with healthcare financial management experience. If you have not worked in healthcare before you would not have the required experience and may not be able to successfully complete the HFMA CHFP examination at this time.

HFMA now provides advanced technical study certificate programs in the following areas: healthcare accounting & finance, patient financial services and managed care. These programs would be helpful to individuals seeking appropriate technical knowledge and skill development to work in healthcare finance. Go to hfma.org/certification for more details.

Q: Are the HFMA Certifications, CHFP and FHFMA, recognized in the healthcare finance industry?

A: HFMA certification is widely recognized among healthcare finance professionals and their organizations. A growing number of organizations are requiring HFMA certification for their finance leaders. Becoming certified distinguishes you as a leader as well as a role model in the healthcare finance community. Earning the CHFP credential enhances your credibility, supports your professional development, demonstrates a high level of commitment to the field, and validates your skills and knowledge. Note: HFMA’s certification programs prepare you for increasingly responsible positions in the healthcare finance industry. Certification demonstrates your comprehensive understanding of healthcare financial management overall.

Q: Why were changes made to the certification program?

A: HFMA desires to provide deep technical financial management education and career development opportunities. Certification is an integral service to achieving these goals.

HFMA conducted a comprehensive field study to review certification program features. The findings specified members’ desires for:

- Financial management education that is comprehensive, cross-functional, integrated;
- Increased access and availability of preparation materials and examinations;
- Ease of use

Should you have additional questions, email certification@hfma.org.
HFMA’s Board of Examiners employed these findings as guiding principles in restructuring HFMA certification.

**The CHFP exam**

**Q: How much do the new 2011 materials cost?**

A: The ability to provide materials (study guide and exam) online allows HFMA to provide them more economically, decreasing the total financial commitment. The chart below shows the new costs:

<table>
<thead>
<tr>
<th>2011 Certification Program</th>
<th>Fees</th>
</tr>

</tbody>
</table>

**Q: How is the new 2011 certification examination structured?**

A: The certification examination consists of 150 multiple choice questions delivered via the Internet. The exam covers six content areas: revenue cycle, budgeting & forecasting, financial reporting, internal controls, disbursements and contracting. See pages 7 and 8 for more detail on content. Candidates will be allowed 4 hours to complete the examination.

Unsuccessful candidates will be allowed to retest according to certification program policies for retesting.

**Q: How is the new 2011 certification exam administered?**

A: The examination is delivered via the Internet at designated testing sites operated by Castle Worldwide. Over 400 sites are currently available to HFMA and sites may be found in all 50 states (including Puerto Rico). Go to [http://www.hfma.org/chfp/](http://www.hfma.org/chfp/) for a listing of the cities, states and zip-codes in which Castle Worldwide sites are available. Candidates will make all exam scheduling arrangements online. When registering, candidates will be able to view the exact address for their selected testing site prior to confirmation. The majority of Castle Worldwide sites are open for testing Monday through Saturday during normal business hours. Exam candidates may select a date and time based on site availability during exam registration (online via Castle’s website). This change to using testing centers was made to make certification services easier for

Should you have additional questions, email certification@hfma.org.
candidates to use by streamlining candidate processing and to increase access to the examination.

**Q: What is the required passing score for the 2011 CHFP examination?**

**A:** The required passing score is 21. The HFMA National CHFP examination uses scaled scoring, similar to the college entrance ACT test.

In virtually every testing situation, raw scores on an examination are “scaled” meaning that they are translated to a scale that provides interpretability of the raw score. Most candidates taking the certification examination expect and often utilize a scale widely employed in the academic world: if the total number of correct answers is equivalent to 70% of the total questions answered the candidate passes. However, a percentage alone does not provide for a fuller interpretation needed for certification purposes. A certification examination is intended to assess and verify that a candidate possesses the required knowledge and skills to successfully practice in a profession. The scores must reference professional capability. A brief explanation and example should help clarify the use of a fuller scaling.

It is important to know that the score scaling that HFMA does is a combination of “norm-referencing” and “criterion-referencing”. These are standard testing and measurement industry practices. HFMA’s scaled scores refer past a simple percentage correct to a specified group (seasoned financial managers –the norm) and what this group must know and be able to do (the criteria) to be successful. These two characteristics are used under the guidance of a consulting psychometrician as the foundations of the scaled scores. The intention is to communicate to a candidate and others how they compare to the reference group in terms of knowledge and ability. Should the candidate be included among the referenced professional group or not?

Suppose a candidate on a professional certification exam is informed that his/her score is “65”. What does 65 mean? Suppose the candidate is further informed that the 65 equates to an “18” on the score scale and is considered passing. The candidate may be further informed that 18 is threshold for passing and one score point out of a possible 40. The candidate will gain the insight that although he/she passed, there is much yet to learn and master.

HFMA exams use a scale from 1 to 30. The maximum score is 30 and minimum passing score is 21 for this examination. HFMA Board of Examiners policy is not to disclose the values of the score band widths nor which questions were answered incorrectly.
Q: Can I use a calculator when taking the CHFP exam?

A: Candidates are permitted to bring a personal calculator. Note: candidates using calculators with more than 4-functions, the following restrictions will be in place:

- Non-communicating, non-programmable, battery–operated, silent, and non-printing calculators are permitted.
- Calculating and computing devices with a QWERTY keypad arrangement similar to a typewriter or keyboard are NOT permitted.
- Calculators with the following functions are NOT permitted: execute, memo, formula, program, forward, reverse, go to, run, learn, LRN, or related abbreviations.

Q: What is the process for retaking the 2011 certification examination should I be unsuccessful?

A: HFMA Board of Examiners’ Policy stipulates that a candidate must wait at least 90 days before being allowed to retake the certification examination. This is standard testing industry practice and allows time for candidates to further prepare for the examination. Candidates may re-register for the examination through HFMA’s testing provider partner Castle Worldwide. A $200 examination retake fee will be charged (No additional fee will be charged for the CHFP application).

Q: Will chapters still have a role in the examination process?

A: Chapters will continue to be actively involved in the certification process especially with regards to helping candidates prepare for the examination. However, chapters will no longer be required to provide the IT infrastructure and proctors needed for certification testing.

**Studying**

Q: Are there study materials available to assist in preparing for the examination?

A: The primary and most important preparation for the certification exam is management experience. The certification examination assesses seasoned management capabilities. Additionally, there is preparation material designed to identify and examine the fundamental concepts and skills expected of an experienced mid-level healthcare finance manager. Note however, that the study materials do not address everything a seasoned healthcare finance manager needs to know. The certification exam is not limited simply to material covered in the study materials.

Should you have additional questions, email certification@hfma.org.
The study materials are available online and cost $195. Access to the preparation materials is for one calendar year from the date of purchase. It is recommended that the certification examination be taken within that one year access period to allow for further study in the event a retake is needed.

Online preparation material features:
- HFMA is no longer providing certification preparation materials in printed form - online delivery provides wider access to the content, the ability to update materials more quickly and makes the preparation materials more affordable for candidates.
- Preparation materials are designed as an online learning experience - providing a print option would lose important learning features, e.g. feedback on quizzes, answers to problems, the opportunity to submit a question, etc.
- Increased accessibility – the content can be accessed practically anywhere through multiple tools – desk tops, laptops, hotel TV/internet, etc. With broad and growing connectivity to the internet, online presence makes market sense.
- The online delivery model has some wonderful user features: bookmarking and searchable content

The online preparation course has an end-of-course test associated with it for individuals seeking NASBA approved CPE credit. Due to its usage as a CPE exam, answers to the questions are not currently provided. Additional non-CPE end of course exams will be developed in the near future.

Q: Do I have to review the new preparation materials in order to successfully complete the new certification examination?

A: No. It is very possible that experienced mid-level finance professionals who have been involved in ongoing professional development and education may pass the examination. Remember, the preparation materials are a guide for successfully completing the examination but cannot substitute for practical experience.

Q: Where can I find the sample test?

A: Use this link to locate the sample test: http://www.hfma.org/Education-and-Events/Certification/CHFP/Sample-CHFP-Certification-Online-Exam/

Q: How is the sample test structured?

A: HFMA’s certification examination is a multiple choice exam delivered via the Internet. Certification candidates are often inexperienced with Internet-based testing and wish to learn more about this testing method. HFMA developed a sample test to help familiarize
candidates with the certification testing format. The 50 question sample HFMA certification examination is a multiple choice exam delivered via the Internet.

**Q: Will the sample test help me to pass the exam?**

A: No. The sample test shows you what the exam actually looks like and how it functions. The exam provides the opportunity to experience the internet testing format used in certification testing. Participants are exposed to testing functionality, test-item formats and scoring. Please note that the sample test in intended to familiarize you with certification examination administration. The sample exam is NOT a predictor of how a candidate will score on the certification examination.

**CHFP Exam Content**

**Q: What topics are presented in each of the six content areas?**

A: The practice knowledge and skills presented in the preparation materials and assessed in each content area are summarized in the following chart. Approximate weightings of each content area in the examination are listed.

<table>

11 Authorization
12 Procurement (e.g. contract, RFP)
13 Verification/Approval
14 Payment processing/posting

Total

III. BUDGETING/FORECASTING FUNCTIONS 18-22%

- Data collection and analysis (historical, volume, revenues, expenditures)
- Projection (revenue, volume, expense)
- Capital planning (e.g., needs assessment, building and equipment)
- Cash flow (in and out)
- Budget analysis and monitoring (e.g., variance analysis)
- Financing options analysis (e.g., tax-exempt, lease/purchase, debt instrument, cash equity/stock)

Total

IV. INTERNAL CONTROL FUNCTIONS 15-19%

Controls
- Segregation of duties
- Safeguarding of assets
- Safeguarding of data
- Regulatory compliance (HIPAA, EMTALA, PHI, Stark, Sarbanes-Oxley)
- Billing compliance (e.g. internal audits, charge validation, MAC, RAC, ZPIC, MIC, OIG, FCA)
- Information technology system validation (interfaces and hand-offs)

Total

V. FINANCIAL REPORTING FUNCTIONS 16-20%

- Preparation of financial statements (e.g. GAAP, non-GAAP, period-end closing)
- Governmental reporting (e.g., cost reporting, IRS reporting, Medicare/Medicaid, CHAMPUS)
- Internal management reporting (e.g., cost accounting, productivity analysis, benchmarking, departmental analysis)
- Ratio analysis (e.g., days in accounts receivable, days in accounts payable, cash on hand)

Total

VI. CONTRACT MANagements FUNCTIONS 13-17%

- Monitor contracts to ensure performance compliance (e.g., physician, payor, maintenance, vendor, group purchase organizations, purchasing)

Q: How often will the certification content be updated?

A: The fundamental value of certification is its relevance to contemporary practice. This is of particular importance in an industry as dynamic as healthcare. Therefore, the certification content will be reviewed annually and updated as needed.
Comprehensive field study findings, such as those HFMA now possesses, generally remain current for three to five years depending on developments in the professional environment. HFMA continues to monitor the healthcare financial management profession and the industry business environment and will conduct additional field study as needed.

**Miscellaneous**

**Q: Will HFMA still provide the National Coaching Course at Annual National Institute (ANI)?**

A: HFMA will not be hosting the National Coaching Course at ANI. Check with your chapter for details on any local coaching classes.

**Q: Will HFMA still provide the opportunity for members to take the CHFP exam at the Annual National Institute (ANI)?**

A: ANI attendees can register to take the CHFP exam at ANI. The HFMA CHFP exam will be held at the Castle Worldwide Orlando test center and transportation will be provided for you. Registration for the exam is separate from ANI registration and you must register for the exam prior to ANI. More details can be found here: [http://www hfma org/Education-and-Events/Certification/CHFP/ANI-CHFP-Registration/](http://www.hfma.org/Education-and-Events/Certification/CHFP/ANI-CHFP-Registration/)

**Q: Will the process to maintain certification by changed?**

A: No. Certified members will still be required to complete 90 hours of continuing education across a three-year period. Continuing education will continue to be reported using HFMA’s online reporting system.
